

Tire Manufacturing Process

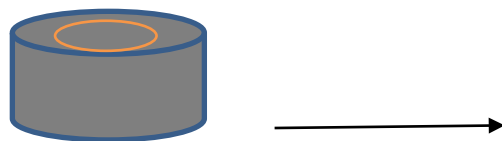

1. Mixing process
(Mix raw rubbers and compounding agents to form board)

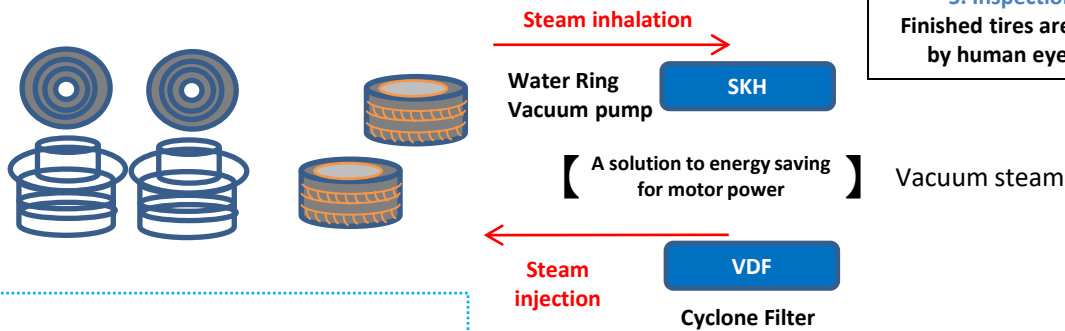

2. Parts manufacturing process
(Produce 3 main parts of tire: carcass, bead, and tread)

3. Parts assembly process
(3 semi-finished parts are assembled to form a single tire (Green tire))

4. Vulcanization process
(Green tire is pressed with steam at high temperature and pressure in molds)

5. Inspection & Shipment
Finished tires are strictly inspected by human eyes and machines
